## Webinar

### *Hybrid Communications - How to use the standards*

10. December 2020 - 14:00 - 16:00 CET

for ISO/TC 204 members and guests

This webinar is related to the following standards developed by members of PT 1605. PT 1605 is a project team belonging to CEN/TC 278/WG 16, which is funded by the European Commission under Grant Agreement SA/CEN/GROW/EFTA/453/2016-11.

- CEN/ISO TS 21184: Global transport data management (GTDM) framework
- CEN/ISO TS 21177: Secure communication sessions
- CEN/TS 17496 - ISO/TS 21185: ITS communication profiles
- CEN/ISO TS 21176: Position, velocity, time facility
- CEN/ISO TR 21186: Guidelines on the usage of C-ITS standards  
Complemented by a publicly available Brochure.

Agenda:

1. H.-J. Fischer: ***Introduction to PT 1605 and on global standardization in the ITS domain***
2. T. Ernst: ***Functionalities of the ITS station architecture to support hybrid communications in C-ITS services***
3. Questions and answers

Registration for the webinar prior to its start is necessary at:

- <https://iso.zoom.us/meeting/register/tJAsdO2gqzgsEtfDSvpWewc9DkuL2WM7rLJC>

Successful registration will be confirmed by email, containing the login details.

This invitation and an abstract of the presentations can be found at <http://its-standards.eu/PTs/PT1605/index.html> in the folder "Webinars".

The presentations will be made available online for download at the URL presented above after the webinar.

The webinar will be recorded.
